THE RESIDENT

Entering its fifth season, **THE RESIDENT** continues to shine a light on the daily heroism of our health care workers. The provocative medical drama follows the doctors and nurses at Chastain Memorial Hospital as they face personal and professional challenges and fight for their patients' health.

Season Four saw a multitude of highs and lows as the heroes at Chastain struggled to overcome the impossible, including the unprecedented and devastating Covid-19 pandemic. Now, in a propulsive and emotional Season Five, the ante is upped, as the doctors continue to save patients and fight corruption in the healthcare system, this time with a partner. The alliance with Big Pharma that found a cure for sickle cell disease last season proves in Season Five to be a very sharp double-edged sword.
